Unit Mounted Alarm Panel

Optional Remote Alarm Mounted on Drillers Panel

*DB40-0400 Air Operated Float Switch (Shown)
DB40-0500 Electric Float Switch*

Field installed Alarm System

Fluid Level, Rig Air Pressure, and Accumulator Pressure are monitored. Should any of these fall below preset levels, the horn will sound as well as lighted visual indication. The horn may be acknowledged, with timer settings of up to 60 minutes before the horn will sound again. The warning light will remain lit until alarm condition is corrected.

The Alarm System may be added to existing equipment, or incorporated into new equipment.
